

## The TechnicalCounsel<sup>SM</sup> News Volume 2, Number 1 February 2005

Dear Friends and Colleagues,

Welcome to the February issue of *The TechnicalCounsel<sup>SM</sup> News*, our consulting practice's quarterly newsletter.

In this issue:

- IEEE Computer Society Distinguished Visitors Program sponsors speeches by Mr. Gezelter:
  - Metropolitan New York section
  - Binghamton section
- Encompass DelVal LUG invites speech on OpenVMS on HP Integrity Servers
- NetworkWorld publishes article on Low Volume Denial of Service attacks
- *HP – Intel Developer Seminar* reported in column on OpenVMS.org
- Mr. Gezelter cited in *ComputerWorld* articles on OpenVMS

### ***IEEE Computer Society Metropolitan New York Chapter hosts speech on Computing in the Age of Ubiquitous Connectivity***

The IEEE Computer Society's Metropolitan New York Chapter has graciously invited Mr. Gezelter, as part of the IEEE Computer Society's Distinguished Visitors speaking program, to present *Computing in the Age of Ubiquitous Connectivity* on Wednesday, April 6, 2005.

The full abstract and location of this presentation can be found at:

<http://www.rlgsc.com/ieee/MetroNewYork/2005-04/announce.html>

Following the talk, the slides from the presentation will be available through the above URL.

A description of the IEEE Computer Society's Distinguished Visitor program can be found in Volume 1, Number 1 of the TechnicalCounsel(sm) News.

### ***IEEE Computer Society Binghamton, New York Chapter hosts speech***

The IEEE Computer Society's Binghamton, New York Chapter has graciously invited Mr. Gezelter, as part of the IEEE Computer Society's Distinguished Visitors speaking program, to speak on Friday, April 1, 2005. The exact topic is still under discussion with the chapter, but is likely to be in the networking, security, or systems architecture realm.

The full abstract and location of this presentation can be found at:

<http://www.rlgsc.com/ieee/inghamton/2005-04/announce.html>

Following the talk, the slides from the presentation will be available through the above URL.

### ***Encompass Delaware Valley LUG presentation addresses OpenVMS on Integrity Servers***

Mr. Gezelter will speak at the invitation of the Encompass Delaware Valley LUG at the HP office in Blue Bell, Pennsylvania on Thursday afternoon, March 10, 2005.

His presentation will address the technical issues of assimilating HP's Itanium-based Integrity servers into the IT infrastructure. The technical issues involved in migrating existing VAX and Alpha-based applications will also be examined.

The full abstract for the presentation, together with links to the Encompass Delaware Valley LUG www site can be found at:

<http://www.rlgsc.com/encompass/philadelphia/2005-03/announce.html>

Following the talk, the slides from the presentation will be available through the above URL.

### ***NetworkWorld OpEd on Low Volume Denial of Service attacks***

*How ISPs Can Defend Their Customers*, an OpEd by Mr. Gezelter, appeared in the January 17, 2005 edition of Network World. A link to the complete article can be found on our publications page.

### ***HP – Intel Developer Seminar column published on OpenVMS.org***

Mr. Gezelter published a column on the December 2004 HP – Intel Developer Seminar on OpenVMS.org. In this column, he reported on the impressive state of the then soon to be released *OpenVMS 8.2 for HP Integrity Servers*.

### ***Mr. Gezelter cited in ComputerWorld articles on OpenVMS***

Mr. Gezelter was quoted in a recent ComputerWorld article, *OpenVMS survives and thrives*, on the attractiveness of OpenVMS on Integrity as a platform for future applications. In particular, he commented on the cost savings which can be directly attributed to a platform with a stable, complete programming interface. The entire article is available via a link from the citations section of our publications page.

## ***Upcoming News***

### **Future IEEE-sponsored Speeches**

Mr. Gezelter is in discussion with several IEEE chapters throughout North America concerning presentations under the auspices of the Computer Society's Distinguished Visitor's Program. As scheduling arrangements are finalized, we will keep our readers advised.
